

Austin East Building Main Street Usage Policy

The design of this area is for building egress and no obstructions shall be permitted that may impede the main egress corridor or any of the arterial corridors, which enter this area.

Tables may be positioned along the north wall of the main corridor for the purpose of recruiter displays, etc. Displays along the south wall must be located between the brick pillars in such a manner that nothing projects out past the brick on the inside (main) corridor. No obstructions may interfere with the 10ft corridor width. No displays shall interfere with the various doors, elevator or stairways which make entry into or exit from this area.

This area may be used for general assembly (including tables and/or seating areas) when it is the only area of the building that is occupied and in use. It should also be cleared of all tables and chairs as soon as the event is completed.
