

MASTER COURSE OUTLINE

A. ARET 1200 Introduction to Robotics

B. COURSE DESCRIPTION:

The focus of this course is to provide hands-on learning opportunities using both real and virtual industrial robots. The main emphasis in the course will be focused on safely programming and operating industrial robots. Students will be exposed to various End of Arm Tooling, robot types, the historical trends of robotics, programming methods components of robotic systems, and multiple coordinate systems. These skills and concepts are utilized throughout all of manufacturing and in many other areas.

(2 Cr – 1 lect, 1 lab)
