

MASTER COURSE OUTLINE

A. TRDR 1110 Advanced Operating Procedures

B. COURSE DESCRIPTION:

This course allows the student to gain increased proficiency in coping with highway and traffic environments. Students develop perceptual skill allowing recognition and avoidance of emergency situations through proper handling of the vehicle. Students apply what has been learned in previous courses to “real world” scenarios. Students may be expected to transport a disabled auto to the auto repair shop, or a piece of farm machinery to the repair shop or back to the farm. Extended hours of operation are a large portion of this course in order to provide additional hands-on experience for students.
