The 6 Types of Test-Taking Errors:

1. **Misread direction errors** - these errors occur when you skip directions or misunderstand directions but answer the question or do the problem anyway.  
   *To avoid this type of error, read all the directions.*

2. **Careless errors** - mistakes made which can be caught automatically upon reviewing the test.  
   *To avoid this type of error, watch for simple mistakes carefully as you review the test.*

3. **Concept errors** - mistakes made when you do not understand the properties or principles required to work the problem.  
   *To avoid this type of error in the future, you must go back to your textbook or notes and learn why you missed the problems.*

4. **Application errors** - mistakes that you make when you know this concept but cannot apply it to the problem.  
   *To reduce this type of error, you must learn to predict the type of application problems that will be on the test.*

5. **Test Procedure errors** - mistakes that you make because of the specific way you take tests, such as:
   a. Missing more questions in the 1st-third, 2nd-third or last third of a test.  
      *If you find that you miss more questions in a certain part of the test consistently, use your remaining test time to review that part of the test first.*
   b. Not completing a problem to its last step.  
      *To avoid this mistake, review the last step of a test problem first, before doing an in-depth test review.*
   c. Changing test answers from the correct ones to incorrect ones.  
      *If you are a bad answer changer, then write on your test "Don't change answers." Only change answers if you can prove to yourself or to the instructor that the changed answer is correct.*
   d. Getting stuck on one problem and spending too much time.  
      *Set a time limit for each problem before moving to the next problem.*
   e. Rushing through the easiest part of the test and making careless errors.  
      *If you do this often, after finishing the test review the easy problems first, then review the harder problems.*
   f. Miscopying an answer from your scratch work to the test.  
      *To avoid this, systematically compare your last problem step on scratch paper with the answer on the test.*
   g. Leaving answers blank.  
      *Write down some information or try at least to do the first step.*
   h. **Not following the ten steps to better test-taking.**  
      *Deviating from these proven then steps will cost you points!*  

6. **Study errors** - mistakes that occur when you study the wrong type of material or do not spend enough time studying pertinent material.  
   *To avoid these errors in the future, take some time to track down why the errors occurred so that you can study more effectively the next time.*
